CAGE 0NQD0

Infrastructure Support & Consulting

Freight Transportation Arrangements | Material Coordination | Consulting

Findlay Construction Solutions, LLC supports contractors and public infrastructure projects by connecting transportation providers, material sources, and project teams. Our work brings structure to scheduling, production records, documentation, and billing administration so clients can maintain visibility from project planning through invoice review.

CORE COMPETENCIES

Freight Transportation Arrangements

Support delivery scheduling, project communication, and administrative coordination with transportation providers.

Material Coordination

Coordinate with aggregate sources on availability, project requirements, and supplier documentation.

Consulting & Project Support

Support operational planning, stakeholder communication, and coordination of transportation and material activities.

Production & Billing Administration

Track quantities and delivery records; organize tickets and proof of delivery; support transportation and material invoice reconciliation.

DIFFERENTIATORS

Infrastructure experience. Project support on FDOT transportation and county infrastructure projects.

Connected workflows. Coordination across suppliers, transportation providers, project records, and billing.

Direct accountability. Executive involvement and established relationships across Florida service markets.

Findlay provides coordination, consulting, and administrative support. It does not own or operate trucks, maintain material inventory, or provide freight brokerage services.
